

Energy Saving Ideas

This year we are working towards our 2nd green flag, the energy flag. We have thought of different ideas to help you save energy:

- When you are brushing your teeth don't leave the tap running. We had an idea to get a cup and fill it half way and just use that bit of water so you won't waste all the water.
- Another idea was to get a jacket or a cover for your boiler/ hot water tank if you have one so that all the heat will stay in your house for longer.
- We said that if you only want one cup of tea don't fill the kettle up all the way because you are wasting hot water, but if you do by an accident and you don't want the hot water to go to waste, you can pour it into a flask and use it for something else later that day.
- One other good one is to get energy saving lights, they may be a bit more expensive than other lights, but you won't have to keep on buying new ones because they last a few years.

Did you know that it costs more when your fridge is empty than it does when it's full if your fridge does happen to be empty you can get big bottles of water and fill them so that you're saving money.

So help your own pockets too by saving energy at home!

More information to come! By Aoife, Green School Committee member.
